KSI keyboards
is an essential
element of your
desktop hygiene
policy

KSI-2001 SX checks all the boxes
for desktop cleanliness at shared workstations

KSI-2001 SX

HYGIENE KEYBOARD

High-touch
surfaces require
intentional and
habitual cleaning
workflows

WITH AWARD-WINNING LINKSMART TECHNOLOGY
POWERED BY SAN-A-KEY® SOFTWARE

User-defined keyboard sanitation
system designed to aid in the control
of cross contamination at shared workstations

LINKSMART

WITH *San-a-Key®*

Helps organizations reinforce cleaner workspace habits without disrupting productivity.

LinkSmart with San-a-Key® is a Comprehensive, Sustainable Desktop Hygiene System

KSI-2001 SX B, with KSI's patented LinkSmart cleaning button and included San-a-Key® software, reduces cross-contamination and germs that negatively impact employee and patient health. In healthcare environments, the keyboard supports infection prevention protocols.

FEATURES & BENEFITS

- Durable, chemical-resistant, scrubbable surface
- Crevice-free surface prevents dirt and germ penetration
- LinkSmart disengages keys for user disinfection
- San-a-Key® animated, onscreen guide aids cleaning
