

KSI-2400 Series

Contactless Logon & Auto Logoff

PresenceLock™ + RFID Monitor-Mounted Security

Log on with passwordless, contactless dual frequency RFID

Log off upon walkaway with PresenceLock™ human presence detection — without software install

The perfect solution for healthcare, financial services, corporate enterprise, retail, government, more

Passwordless Solution for Shared Workstations

Secure Logoff Without External Software

PresenceLock™ prevents an unauthorized person from accessing an active session at a vacant desktop

Detection zones are easily set based on a user's distance from the integrated sensor

COMPACT SECURITY SOLUTION

KEY FEATURES & BENEFITS

- Optional, integrated dual frequency card reader eliminates use of passwords
- Reads 125 kHz and 13.56 MHz credentials
- Compatible with leading SSO platforms
- Features helpful RFID confirmation beep
- PresenceLock™ detects human presence in real time to securely auto lock the PC upon walkaway
- Locks a PC within seconds of a user's departure and ensures always-secure vacant workstations
- Presence detection zones are set based on a user's distance from the device
- Simple-to-program settings — on, off, distance, timing
- Solution is easy to deploy, with no-software setup
- Mounts easily to top or bottom edge of monitor — fits both thin and thicker monitors

SPECIFICATIONS

- 3"W x 1.3" H x .85" D — only 2" D including hinged bracket
- Reads 125 kHz and 13.56 MHz credentials
- Connects via Type A USB 2.0 cable
- Windows 11, macOS, IGEL, and Linux compatible
- Pre-applied double-faced tape for mounting
- Integrated mounting screw for use on thin monitors

FORM FACTOR CONFIGURATIONS
